

HEDIS^{®1}: Breast Cancer Screening (BCS)

Description of the measure

Women 50-74 years old who had a mammogram screening for breast cancer between October 1 two years prior and December 31 of the measurement year.

Exclusion(s)

- Bilateral mastectomy
- Two unilateral mastectomies
- Members who are at least 66 years old with frailty and advanced illness as of December 31 of measurement year; Medicare members who are at least 66 years old enrolled in I-SNP or with LTI flag as of 12/31 of the measurement year

Tips for best practice

- Outreach to patients who have not yet had a mammogram
- Emphasize the importance of regular mammogram screenings even when not experiencing any symptoms
- Understand and discuss any possible fears the patient may have

Exclusion	ICD-10 CM/PCS	Modifier	CPT
History of bilateral mastectomy	Z90.13	--	--
